
40526-G: Microsoft Cloud Workshop: SAP HANA on Azure

In this workshop, you will learn how to provision a highly available deployment of SAP HANA in Azure. Throughout the whiteboard design session and the hands-on lab, you will look at the planning process for SAP HANA migration and deployment. You will identify and implement Azure infrastructure components necessary to support a clustered deployment of SAP HANA. You will also step through installing SAP HANA and configuring SAP HANA system replication. Finally, you will review and test different scenarios that involve manual and automatic failover between cluster nodes.

Intended Audience

This workshop is intended for Cloud Architects and IT professionals who have architectural expertise of infrastructure and solutions design in cloud technologies and want to learn more about Azure and Azure services as described in the 'About this Course' and 'At Course Completion' areas.

Topics

- Whiteboard Design Session - SAP HANA on Azure
- Hands-On Lab - SAP HANA on Azure
