
55120-A: Quick Microsoft SQL Server 2012-2014 Integration Services

This two-day instructor-led course is intended for those that are new to SQL Server Integration Services or are interested in learning the features available. This course uses an instructor-led topic explanation, instructor performing detailed demonstrations, then the student performing exercises to duplicate what the instructor demonstrated. This style of training is a combination of traditional classroom training and mentored learning. Additionally, videos of the demonstrations performed by the course author are included with the course as a take-away. The course completes with additional scenario-based labs to reinforce the course content.

Audience

This course is intended for IT Professionals.

Topics

- Course Overview
- SQL Server Integration Services Architecture
- SQL Server Integration Services Tools
- SQL Server Integration Services Tasks
- Data Flow
- Variables, Parameters and Expressions
- Containers
- Performing Joins
- Tuning SQL Server Integration Services Packages
- Debugging SQL Server Integration Services Packages

- Common SQL Server Integration Services Design Patterns
- Installing, Upgrading, and Migrating to Windows 7
