
AZ-400T01-A: Implementing DevOps Development Processes

This course provides the knowledge and skills to implement DevOps processes. Students will learn how to use source control, scale Git for an enterprise, and implement and manage build infrastructure.

Objectives

- Describe the benefits of using source control
- Migrate from TFVC to Git
- Scale Git for Enterprise DevOps
- Implement and manage build infrastructure
- Manage application config and secrets
- Implement a mobile DevOps strategy

Intended Audience

Students in this course are interested in implementing DevOps processes or in passing the Microsoft Azure DevOps Solutions certification exam.

Topics

- Getting started with Source Control
- Scaling git for enterprise DevOps
- Implement & Manage Build Infrastructure
- Managing application config & secrets

- Implement a mobile DevOps strategy
