
AZ-800T00: Administering Windows Server Hybrid Core Infrastructure

This course teaches IT Professionals how to manage core Windows Server workloads and services using on-premises, hybrid, and cloud technologies. The course teaches IT Professionals how to implement and manage on-premises and hybrid solutions such as identity, management, compute, networking, and storage in a Windows Server hybrid environment.

Audience

This four-day course is intended for Windows Server Hybrid Administrators who have experience working with Windows Server and want to extend the capabilities of their on-premises environments by combining on-premises and hybrid technologies. Windows Server Hybrid Administrators implement and manage on-premises and hybrid solutions such as identity, management, compute, networking, and storage in a Windows Server hybrid environment.

Topics

- Introduction to AD DS
- Manage AD DS domain controller and FSMO roles
- Implement Group Policy Objects
- Manage Advanced features of AD DS
- Implement Hybrid Identity with Windows Server
