
Deploying to Oracle Cloud Infrastructure with Terraform Ed 1

Embark on your SysOps journey with Terraform to implement infrastructure as a code. Understand the core terraform workflow, install terraform and explore terraform scripts to deploy VCN, Compute Instances, and other resources on OCI without using OCI console. Lastly discover and deploy Jenkins.

Objectives

- Installing and configuring Terraform
- Using Terraform for Infrastructure as code implementation

Topics

- Terraform Overview and Installation
- Creating OCI Components with Terraform
- Hosting Jenkins on OCI
