## *Dynamics 365: Power Platform test and deploy*

---

### **Module 1: Manage Instances and Applications**

In this module students will learn how to enable and update first-party applications, install third-party apps, and configure using admin portals.

#### **Lessons**

- Overview
- Manage applications
- Module summary

After completing this module, students will be able to:

- Enable and update first-party apps
- Install third-party apps

### **Module 2: Manage Solutions**

In this module students will learn how to create, manage, and deploy solutions.

#### **Lessons**

- Solution concepts
- Planning and creating solutions
- Working with solution components
- Distributing solutions
- Working with managed solutions
- Module summary

After completing this module, students will be able to:

- Create, manage, and deploy customizations with solutions

### **Module 3: Additional Deployment Considerations**

In this module students will learn how to configure for mobile and deploy components such as Microsoft Flow.

#### **Lessons**

- Configure
- Mobile configuration settings
- Mobile configuration
- Module summary

After completing this module, students will be able to:

- Configure for mobile
- Deploy components

#### **Module 4: Documentation and Testing**

In this module students will learn how to design test plans and perform performance tuning.

##### **Lessons**

- Creating test plans
- User interface testing
- Performance optimization and tuning
- Documentation
- Engage with the customer
- Module summary

After completing this module, students will be able to:

- Create and use test plans
- Locate performance tuning tools
