
Oracle BPM 12c Essentials Ed 1

This Oracle BPM 12c: Essentials Ed 1 training teaches you how to use Oracle BPM 12c to collaboratively discover and define process models. Explore enterprise maps to value chain models to detailed process flows.

Objectives

- Create business architecture projects and run reports
- Roll up key performance indicators in business architecture reports
- Deploy a business process to BPM Run Time
- Participate in a running process as an end user
- Analyze process workload and performance using Oracle Business Process Workspace
- Collaborate with others who are working on the same BPM project
- Document business processes
- Describe the Business Process Management (BPM) life cycle and how the various components of the Oracle BPM Suite are used
- Create process models and other artifacts using Oracle Business Process Composer and Oracle BPM Studio
- Create and implement user tasks, business rules, and service tasks
- Handle exceptions
- Configure process analytics to gather both standard and custom process metrics
- Create real-time dashboards using Oracle Business Activity Monitoring (Oracle BAM)
