## Oracle VM Server for x86 Administration

---

This Oracle VM Server for x86: Administration training teaches you how to build the infrastructure for open cloud computing. Learn to deploy pooled server resources to create virtual machines supporting enterprise applications.

### Objectives

- Use cloning with templates to create additional virtual entities
- Install the Oracle VM Server for x86 and the Oracle VM Manager
- Exercise high availability, live migration and anti-affinity policy
- Explore and use the Oracle VM Manager UI and CLI
- Discover and manage Oracle VM servers
- Add networks and storage to support the Oracle VM environment
- Create and manage server pools
- Create and populate repositories with virtual resources
- Perform the steps to create and operate virtual machines

### Topics

- Introducing Oracle VM with Oracle VM Server for x86
- Planning and Installation
- Managing Servers and Networks
- Managing Storage
- Server Pools and Repositories
- Managing Virtual Machines
