
Oracle WebCenter Sites 12c for Developers Ed 2

The Oracle WebCenter Sites 12c for Developers training exposes developers to the critical pieces of a new implementation using Oracle WebCenter Sites 12c. It takes you through the journey of starting a new implementation, beginning with a Design Document and wireframes and ending with rendering a new website.

Objectives

- Configure aspects of the user interfaces based on user roles and permissions
- Create and manage a content management site in Oracle WebCenter Sites 12c
- Describe the new Development Constructs introduced in Oracle WebCenter Sites 12c
- Develop templates and element code by using WebCenter Sites custom JSP tag libraries
- Discuss the new functionality introduced in Oracle WebCenter Sites 12c
- Produce a fully functional website
- Understand the building of custom asset types and a content model
