
SRS (Software / System Requirement Specification)

Topics:

- specifies the required processes implemented in the engineering activities that result in requirements for systems and software products (including services) throughout the life cycle;
- provides guidelines for applying the requirements and requirements-related processes described in ISO/IEC/IEEE 15288 and ISO/IEC/IEEE 12207;
- specifies the required information items produced through the implementation of the requirements processes;
- specifies the required contents of the required information items;
- guidelines for the format of the required and related information items.
